In this project the goal is to make an app that converts Ferhinte to Celiculus.

Temperature In F

Convert F to C
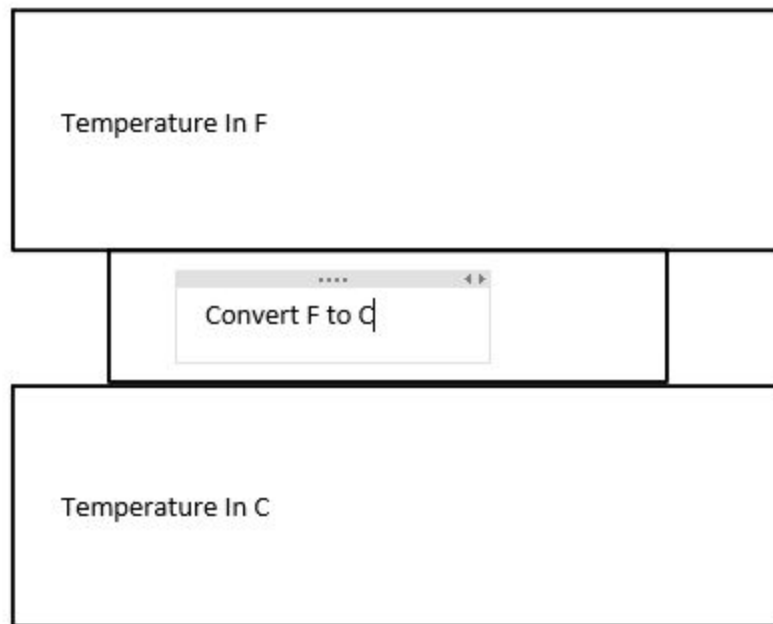

Temperature In C

The image above is the basic model of what UI is going to look like but may differ from the final product. The design is used by many websites that offers Temperature conversion. User will input temperature in F on the top box. Once done he or she will press convert which then will convert F to C and output it to the C box.
